Safety-Related Resources for Organizations

All four current SSCCs and TACFS are working to make tools and trainings available to providers to enhance safety. Providers may access, at no cost, the following resources:

- 1. Praesidium's Training for Organizational Leaders Administrators and leaders will learn strategies and research-based abuse risk management techniques, as well as ways to equip staff and supervisors with skills and best practices to prevent abuse.
- 2. Praesidium's Organizational Self-Assessment This online self-assessment tool will allow organizations to quickly and confidentially learn the strength of their policies and practices designed to keep those in their care safe from abuse.
- 3. Texas Center for Child and Family Studies Bystander Intervention Training Bystander intervention is when a person notices a problematic/unsafe/inappropriate situation, then takes on the personal responsibility to take some type of action to intervene. Staff will be given tools to feel empowered to do something to prevent potential abuse or harmful situations.

Provider Support & Consumer Affairs

- Coordinated Provider meetings to staff youth and determine needed supports so providers could maintain placement of youth.
