**Exceptional Item 1**

Fund Foster Care/Adoption Subsidies Caseload Growth

**Request**

The LBB recommended budget funds an average number of FTE children per month in paid foster care of 17,997 in FY 06 and 19,034 in FY 07. The February update of foster care caseloads provided by HHSC indicate an average number of FTE children per month in paid foster care of 19,257 in FY 06 and 21,050 in FY 07, a difference of 1,260 per month for FY 06 and 2,016 per month for FY 07.

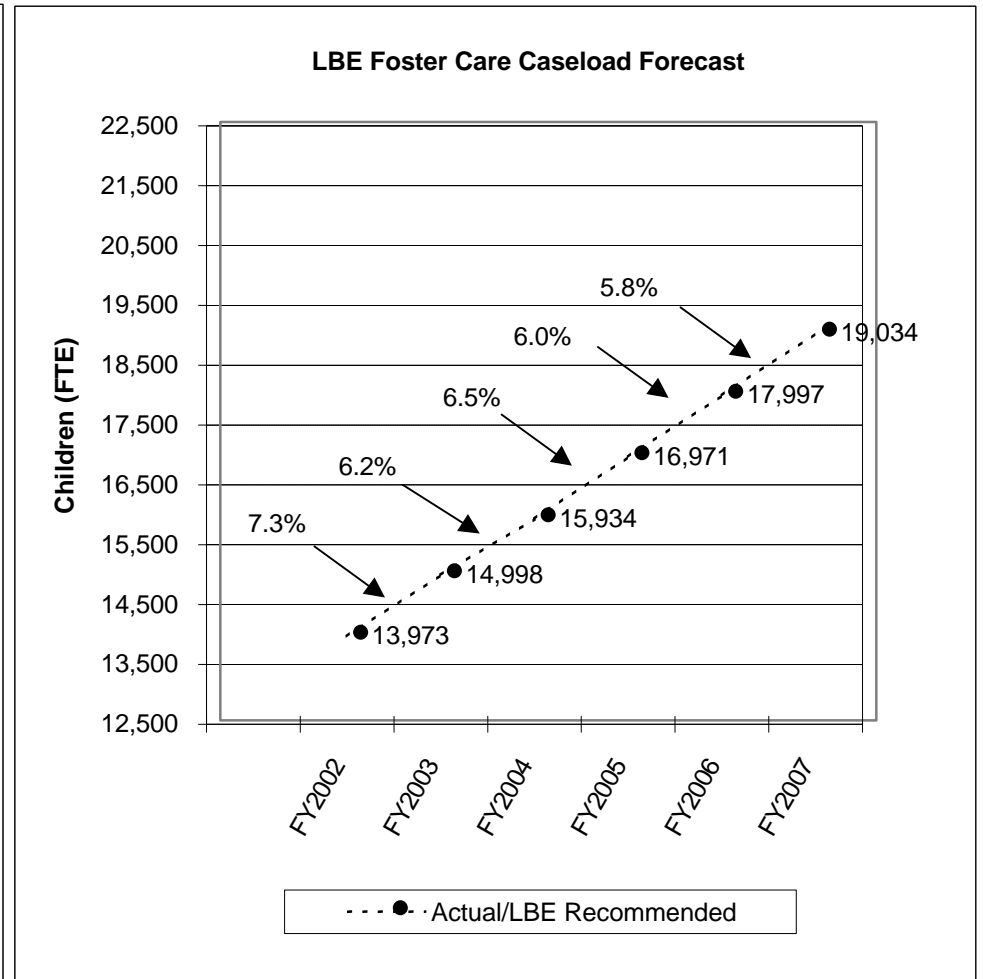

Similarly, the LBB recommended budget for adoption subsidies funds an average number of children provided adoption subsidies per month of 19,118 for FY 06 and 20,385 for FY 07. The February 2005 HHSC updated forecast indicates an average number of children provided adoption subsidies per month of 19,639 for FY 06 and 21,159 for FY 07, a difference of 521 per month for FY 06 and 774 per month for FY 07.

This exceptional item requests funding for the difference in HHSC's forecasted caseloads and the caseloads contained in the LBB recommended budget. The cost is calculated based on the current FY 2005 rates.

Maintain Critical Accountability and Oversight

**Request**

---

The LBB recommended budget reduces the agency's administrative infrastructure by approximately 10% for staff and 12% for the agencywide automated systems cost.

These FTEs and dollars provide the financial, technological, operational, administrative legal, and executive support and oversight for all programs. These cuts directly affect the agency's ability to effectively support the current needs of field staff. In addition, the agency's ability to successfully implement the reforms called for by Executive Orders RP 33 and RP 35 related to the APS and CPS programs will be greatly compromised if the administrative infrastructure is reduced. In fact, to adequately implement APS and CPS Reform an increase in indirect administration staff is required.

Fund Stemmons Office Relocation

**Request**

---

One of DFPS' largest leases for office space located in Dallas will be expiring at the end of December 2005. The lessor has other plans for the building and will not negotiate another lease or provide an extension to the current lease. As a result, DFPS will have to move staff from the Stemmons location to two new replacement sites. The two new sites will house a combined total of about 800 DFPS staff.

The existing office equipment, telecommunication equipment and computer equipment located at the Stemmons office will be moved to the new locations. Additional telecommunication equipment and computer network equipment will be required at the second office site.

The costs associated with this item include moving and installing technology equipment, cabling, purchasing new phone switch, routers, and security system, and the cost to physically move the office.

Fund CPS Reform

**Request**

Under Executive Order RP 35, HHSC was directed to review and reform the CPS program. They issued a final report on January 6, 2005.

The report contained recommendations to strengthen investigations, support quality casework, improve services to families and children, build community partnerships, improve management and accountability, and prevent maltreatment.

This exceptional item requests the funding for these recommendations as well as funding for related caseload growth in the foster care program and for additional Statewide Intake call center staff to address the related increase in call volume.

Increase Foster Care Rates

**Request**

FY 04-05 appropriated funding for the average daily rate for foster care represents a 3% reduction from the FY 03 average daily rate. A partial rate restoration was approved for FY 04-05 that increased the average daily rate by 1.01%. After this partial rate restoration, the net reduction to the average daily rate was 1.99%.

This exceptional item requests the funding needed to restore this net rate reduction to the average daily rate paid in FY 03. It also requests funding for a 3.36% rate adjustment that is based on the April 2004 forecasted Personal Consumption Expenditure (PCE) inflator. The total increase to the average daily rate for foster care associated with this exceptional item is 5.35%.

Adequate funding for foster care reimbursement rates is essential to recruiting quality foster families and to ensure all children in foster care are provided quality care. Increasing the capacity of foster home placements provides children with additional placement options and improves the matching process for selecting families that can meet the individual needs of a particular child or sibling group.

Maintain Services to At-Risk Youth

**Request**

Instructions were provided to all agencies by the LBB and the Governor's Office limiting the agency's baseline request for general revenue-related funds to 95% of the sum of amounts expended in FY 04 and budgeted in FY 05. DFPS applied the baseline reduction to the Services to At-Risk Youth (STAR) program, resulting in a 26.4% funding cut for that program. The LBB recommended budget restores \$1.3 million of the \$9.4 million reduction for the biennium.

This exceptional item requests funding to restore the remaining reduction to this prevention program so that current services can be maintained. This prevention program is the only one that provides services in all 254 counties, and serves children ages 0-17 who are runaways, delinquents, truants, or living in situations where they are at risk of delinquent conduct or child maltreatment. The current service level represents a 16% reduction from FY 03 levels. If current service levels are not maintained, the program could no longer continue to operate in all counties.

Maintain APS MH/MR Current Caseload per Worker

**Request**

Based on the projected workload indicators, such as an increase of 4% each year of the FY 06-07 biennium in the number of investigations of abuse, neglect, and exploitation, the agency needs additional direct delivery staff to meet increased demand for services in the APS MH/MR Investigations Program.

This initiative seeks additional funding for a staffing level to handle the projected number of investigations over the next biennium at the current level of response. This item would maintain the projected FY 05 average MH/MR caseload per worker of 10.

If funds are not appropriated, current caseload sizes could not be maintained. Higher caseloads would result in employee burnout and high turnover. High turnover leads to more training costs and further impacts caseloads, ultimately resulting in declining quality in investigations that places the agency at risk for potential liability and inclusion in litigation concerning the care of persons served in MH or MR settings. Failure to complete certain investigations in MH and MR settings timely places the state at risk of losing significant federal dollars.

Increase Monitoring of Licensed Facilities

**Request**

The growth in overall child population as well as growth in the number of young school age children, the increasing turnover of childcare staff, and the increasing number of childcare facilities are all factors that impact the number of complaints in childcare facilities.

In order to ensure that children in day care settings are properly protected, this exceptional item requests funding for an additional 20 Child Care Licensing staff to increase the monitoring, training, and technical assistance activity for licensed centers, and to ensure the necessary staffing level needed to address minimum standards violation investigations.

Fund Statewide Intake Technology Needs

**Request**

---

The Statewide Intake 24-hour call center utilizes hardware and software that is standard in the call center industry to route phone calls to appropriate queues, operate the phone system, manage the workforce, and provide management information.

This item would replace the eleven year old Automated Call Distributor (ACD) switch that routes calls to the appropriate queues and helps reduce hold times by balancing across agents. The cost estimate for replacement of the ACD switch is \$1.2 million for the biennium.

Additionally, this item would leverage HHSC's 2-1-1 call center to provide disaster recovery backup services in the event of a catastrophic event that destroys or otherwise makes our current facility uninhabitable. Business service continuity is essential to meeting the agency's mission. This funding initiative requests \$265,120 for the biennium to leverage HHSC's 2-1-1 call center to provide services until the call center could be replaced with a permanent facility.

**Exceptional Item 10**

Restore Prevention Services to FY 03 Level

**Request**

This initiative would restore the 16% funding reductions to the Services to At-Risk Youth (STAR) and Community Youth Development (CYD) programs that resulted from the 78th Legislature, so that funding would be continued at their FY 03 funding level.

This initiative would also re-establish the At-Risk Mentoring, Healthy Families, and Parents as Teachers programs at their FY 03 funding level. At Risk Mentoring, Healthy Families, and Parents as Teachers programs were eliminated beginning in FY 04 due to the funding limitations facing the 78th Legislature.

Restoring STAR and CYD and re-establishing At-Risk Mentoring funding to FY 03 levels will ensure that an estimated 12,228 children who were not served during FY 04-05 will receive services in FY 06-07. Restoration of Healthy Families and Parents as Teachers will ensure that an estimated 2,181 families not served during FY 04-05 will receive services in FY 06-07.

Fund Technology Upgrades/Improvements

**Request**

---

The agency is requesting upgrades and improvements to its technology infrastructure, much of which is over eight years old and is reaching the end of its useful life.

Security Assurances – DFPS is requesting \$1.5 million for the biennium to replace the current 250 small routers with new ones that have a built-in firewall. An additional six large routers will have firewalls added to them. This upgrade addresses a State Auditor requirement for firewalls at the router level.

Server Upgrade/Replacement – \$2.7 million is requested for the biennium for upgrades and replacements for the operating system network servers and the servers hosting the automated CPS and APS casework application and the Child Care Licensing application, which will ensure adequate support is provided to program applications. In addition, an increase in web servers is needed to meet anticipated increased applications and usage on the Internet.

Fund IMPACT Enhancements

**Request**

---

Enhancements to the Information Management Protecting Adults and Children in Texas (IMPACT) system (browser-based version of the CPS and APS automated casework application) are required to ensure continued effective service delivery. The following enhancements are requested:

IMPACT Operational Enhancements – \$0.6 million for the biennium is needed for improvements to the usage of the system, to ensure program needs are met, and to encourage community involvement by building information exchanges with service providers.

IMPACT Enhancements for External Access – \$1.9 million for the biennium is needed for changes to allow vendors to access and update prebill information and to access payment information on-line. It also includes an automated interface between DFPS and Texas Workforce Commission to allow us to receive child specific information for children in our system receiving day care,
